## **DETAILED ACTION**

1. This communication is responsive to the application filed 10/10/2003.

## Election/Restriction

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 11 and 36, drawn to the structures/structural elements of a hearing aid, classified in class 381, subclass 312;
  - II. Claims 1-10, 12-35 and 37-38, drawn to the structures/structural elements of an oscillator, classified in class 331, subclass 57.
- 3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP '806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention I only drawn to a directional hearing aid. The subcombination has separate utility such as an acoustic system other than a hearing aid.
- 4. Because these inventions are distinct for the reasons giving above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I. Restriction for examination purposes as indicated is proper.
